

ANUJ POKHAREL

anujpokharel2@gmail.com • (+977) 9861722204 • [Portfolio Site](#) • [LinkedIn](#) • Ekantakuna, Lalitpur, Nepal

EDUCATION

St.Xavier College

School Leaving Certificate(Plus Two)

MAITIGHAR, KATHMANDU, NEPAL

2016 – 2018

Kathford Engineering College(Tribhuvan University)

Bachelor of Computer Engineering

BALKUMARI, LALITPUR, NEPAL

2019 – 2024

Relevant Coursework: C/C++,Artificial Intelligence,Database Management,Digital logic,CCNA, Numerical Methods,Project Management,Electronics Device and circuit,Electric Circuit Theory

PROJECTS

- **Major Project on Fake Notes Detection Using Convolution Neural Network(2023):**

Led a team of 3 engineers to develop an AI-driven application for Detection of Fake Currency Notes using CNN algorithm. Responsible for team coordination, data collection, data preprocessing, and model Devvelopment , model implementation and fine-tuning using TensorFlow, Matplotlib, and NumPy. Conducted model building and experimentation in Collab, evaluating performance through metrics such as accuracy, precision.

- **Spam Message Detection System(2024)-freelance**

It is personal independent project to gain practical experience of use of AI in cybersecurity Field .Data pre-process,ModelDevelopment,Model Implementation.Especially,I have used transformer for text Classification.

- **Nepali To English Translator(2024)**

I have made simple project using LSTM and Natural Language ToolKit(Nltk) where Nepali Language is translated to English

- **Kankai River Water Level Forecasting (2025)(Real time Solution Pvt Ltd)**

I have use VAR and SARIMA model to forecast Water Level of Kankai River uing or considering Water Level at Deumai and Mai Khola

- **Weather Web and Mobile App**

Geolocation weather result app made Using Django as backend and ReactNative as frontend for Mobile Application and React js-Next js For Frontend web Application

- **Job portal site (freelance)**

This is job portal site made using Django as backend and React js as frontend..Designed and implemented RESTful APIs using Django and DRF to handle user reg-istration, bookings, payments, and service requests. Modeled relational database schemas i.e PostgreSQLto manage users ,jobs and reviews efficiently., subscription,Image message deletion etc

- **Our Briefcase (Codelio Solution)**

This is document signnin site made using react js as frontend and Django as backend.

- **Our CEO (Codelio Solution)**

This is ERP project made using Next j's and Django as backend.Designed and implemented RESTful APIs using Django and DRF to handle users,requests,subscription etc.Use of postgres as database Implementation of stripe.

- **News Web and Mobile App**

Geolocation News app made Using Django as backend and ReactNative as frontend for Mobile Application and React js-Next Js For Frontend web Application with chatbot integration ,use of RAG and Langchain

- **HAMANIO E-Commerce Web and Mobile App(Codexneural)**

this is E-commerce website and Mobile App made by using the Django as backend and React Js as Frontend.Designed and implemented RESTful APIs using Django and DRF to handle user reg-istration, bookings, payments, and service requests.Modeled relational database schemas i.e PostgreSQL to manage users,products, and reviews efficiently..Also implemented celery and Redis for queuing task like subscription,Image message deletion etc and also chatbot integration ,use of RAG and Langchain and Design and Implemented frontend side using react-native.With using android studio for android and Xcode for ios.integrating native APIs (camera, sensors, permissions, storage) and use of Expo Go for deployments and implementing Expo Push Notifications

- **Neatly Mobile app(Neatly)**

This is the cleaning app(U.S project) or marketplace or management software between property owner and House cleaner .Designed and implemented RESTful APIs using Django and DRF to handle user registration, bookings, payments, and service requests.Modeled relational database schemas i.e PostgreSQL to manage users, cleaners, job assignments, schedules, and reviews efficiently.Also implemented celery and Redis for queuing task like job fetching,subscription,Image message deletion etc.Integrated secure authentication systems, including custom user models, role-based access control, OTP verification, and token-based login/logout. Built backend logic to allow admins to assign cleaners to jobs, manage ,upload images/video ,availability, reschedule bookings, and track job statuses in real time. Developed backend support for in-app and push notifications (e.g., Firebase,email alerts, and third-party service integrations for seamless operations.Implemented Messaging system and sending image video.Api integration of stripe,Twilio for Otp and messaging reminder,send grid for email notification.Implementation of expo push notification. Design and Implemented frontend side using react-native .With using android studio for android and Xcode for ios. integrating native APIs (camera, sensors, permissions, storage) and use of Expo Go for deployments and implementing Expo Push Notifications

SKILLS

Technical specialties:

- Programming : Python, Javascript, Typescript
- Frontend: React j's, Next J's, React-Native
- Backend: Django, FastAPI, Node j's, DRF, REST
- Databases&Querying: PostgreSQL, MySQL, MongoDB
- ORMs : Django ORM, SQLAlchemy, Prisma
- APIs: design and implementation of GraphQL and RESTful APIs in cloud Environments
- Task& Queuing : Celery, Redis
- ML/ AI: Deep learning, AI/ML model development, computer vision ,NLP
- Model performance tuning :latency, cost, caching
- Tools/libraries: Scikit-learn, TensorFlow, PyTorch, RAG, Numpy, Pandas, Langchain, Hugging face
- Server Administration: Ubuntu, Debian, open-SUSE
- Cloud security governance: IAM, encryption, data lineage, cataloging, quality frameworks
- Deployment/tools: Git, GitHub, Gitlab, CI/CD pipelines
- DevOps & Automation: CI/CD pipelines, Git (version control)
- Server Configuration Optimization: Nginx, SSL Binding, Reverse Proxy Setup
- Development Practices: Agile/Scrum, CI/CD, debugging performance optimization, reusable scalable module design
- Issue tracking tools: JIRA, Trello, Linear
- cloud & hosting :AWS, Hetzner ,Azure
- Application Servers: Gunicorn, uWSGI
- Testing Tools: pytest, jest, Selenium
- Operating Systems & Scripting: Linux, Shell/Python scripting
- Monitoring / logging: CloudWatch, Datadog
- Virtualization & Multiplexing: tmux, SSH, Docker, PM2, Gunicorn, systemd

Non-Technical skills:

- Performance optimization for large-scale data workflows
 - Clear technical documentation & spec writing
 - Cross-team collaboration & communication.
 - Cost-efficiency and reliability improvements in pipelines
 - Problem solving, estimation, analytical thinking, debugging skills
 - Agile & modern software engineering practices
-

CERTIFICATIONS

- **Coursera** : Front-End Development Course using React j's

WORK EXPERIENCE

Freelancer-Software Developer (software+Data)

JUNE 2021-PRESENT

Real Time Solution Pvt Ltd- Machine Learning Engineer (research)

DEC 2024 – FEB 2025

Neatly,Georgia,U.S-Full stack Developer(Contract)

FEB 2025 – AUG 2025

Codeilo Solution - Full stack Developer(Contract job)

AUG 2025 – Nov 2025
